

Cable trays in electromechanical systems

Overview

Cable trays, or carrier trays, are mechanical support systems for cables. They provide a robust structural that accommodates and safely transports cables from one point to another. It is available with a ventilated or solid bottom. 's construction industry for the past 40+ years. Our experienced teams and operations are present across the Middle-East North Africa regions (MENA) and Pakistan, giving us. Cable trays support insulated electrical cables in industrial and commercial settings. Each cable tray type performs a different function and comes in various materials such as aluminum. Schiavetti Tekno, part of Spina Group, is a leading Italian manufacturer of cable trays and accessories for electrical and instrumentation systems. Since 1964, the company has supplied high-quality solutions for industrial cable management in energy, infrastructure, and plant engineering sectors. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
