

Communication Network Cable Management Frame

Overview

A cable management rack is designed to route, protect, and organize copper and fiber cables inside network cabinets. Beyond keeping cables tidy, a well-structured cable manager reduces cable stress, improves heat dissipation, and ensures bend-radius compliance for data. CommScope offers a variety of easy-to-install frames, racks and cabinets specially engineered for network equipment and fiber cable management. FlexFusion™ Cabinets XG offer a unique universal platform. The Centrix™ System is a high-density fiber management system that provides a balance of industry-leading density with innovative jumper routing. The system can be deployed in multiple applications including central office, headend, FTTx, FTTCs, and data center. While both serve. Belden offers a complete line of open frame racks and cabinets that support all applications, from single-rack or cabinet applications (such as retail and telecom closets) to high-density, multi-rack/multi-cabinet patching and switching fields (in computer rooms, data centers and central offices). The slim profile minimizes visibility.
