

Does the price of cable trays include bracket installation

Overview

Each tray should have brackets that will be attached to pull it against the wall or hangers that will be attached to pull it up to the ceiling. These little metal components are in a huge budget. Costs vary based on tray material (steel, aluminum, or fiberglass), size, design (ladder or solid bottom), and installation complexity. Additional elements like supports, connectors, and brackets. Our cable support systems are part of the Industrial installations area of application and, for all products used in industry, the following applies: They must withstand different weather and ambient conditions, as well as mechanical loads. But it is not merely the cost of the metal, but also where the tray will live and how long it must last. When completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is bent the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when. Ask ten buyers about cable tray cost, and most of them will point to the rate per meter.
