

Fiber Optic Terminal Box Fusion

Overview

This 4 strand optical fiber distribution box is used for the fusion splicing, splitting, wiring transmission and other functions of the optical transmission terminal. It is a necessary equipment in network. Fiber optic termination box series products are auxiliary equipment for terminal wiring in optical fiber transmission communication network, suitable for direct and divergent connection of indoor optical cables, and protect optical fiber joints., which were issued prior to the conversion under the name Pepperl+Fuchs GmbH or Pepperl+Fuchs AG, also apply to Pepperl+Fuchs SE. Suitable for SC,FC, ST,LC,duplex and simplex both available Full assembly or empty panel optional RoHS Compliant This product is a multifunctional box body that can meet various customer needs through different internal components. The product uses high-quality PC+ABS products with reliable strength, and the box body is sealed with silicone sealing strips for safety and reliability. Simple with light weight in design, special snap clip close system convenient for user.
