

Fiber optic patch panel cable routing ring

Overview

The D-ring, or D-ring cable manager is a simple accessory which can be used individually on any suitable flat like wall or installed on cable management panel to provide easy and orderly cable routing. Optical Connectivity 1 The Xpress Fiber Management (XFM) 4RU patch panel is a rack mountable interconnect point specifically designed to manage dense fiber applications. Based on the LGX[®] intermateability platform, the panel is fully compatible with AFL's XFM Optical Cassette, Poli-MOD[®] and WDM. A fiber patch panel is a mounted enclosure—either rack-mounted or wall-mounted—used to terminate, manage, and interconnect multiple fiber optic cables. Each node is connected to two other nodes, forming a ring-like structure. This design ensures data can travel in both directions.
