Overview

The two hearts formed by the 40 red LEDs simulate an electronic optical heart beating. Can be used to decorate a room, inside a car, to attract attention in a shop window, or even given as a token of some special affection! Kit includes all board mounted components and solder. Welcome to the assembly guide for the Breathing Heart Solder Kit! Whether you're a beginner or a seasoned maker, this guide will walk you step-by-step through the process of building your very own LED breathing heart circuit. It is powered by two AAA button batteries (not included in this kit, need to be prepared by yourself), automatically flashing and change various lighting effects within 32 colorful RGB LED. The. This project showcases a heartbeat flowing light effect on an 8x8 LED matrix using an Arduino UNO development board. The code is structured into several key sections: defining pin connections, setting up the Arduino board, the main loop for the heartbeat effect, and functions to control the LED. This double LED heart flasher has more than twice the impact of a single heart. com's Flow Series Heart Shaped shaped halo rings are 86mm in size and use our Flow Series SK6812-RGBW LEDs that can change any solid color, PURE white (Not RGB white), PLUS hundreds of color-chasing patterns! They also feature a milky/frosted coating to help diffuse the LEDs. A moderate level learn to solder kit that includes an IC as well as standard components.
