

# How much does a domestically produced fiber optic switch cost

## Overview

Entry-level switches with basic features and Gigabit Ethernet ports may start from around \$200 to \$500. Home and business fiber optics projects typically range from a few hundred to several thousand dollars, depending on run length, fiber type, and labor needs. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations. Single-mode fiber costs less per foot than multimode fiber, but it requires more. WEINERT's FiberSwitch is designed to allow rapid switching of one input to multiple outputs, or multiple inputs to one output, allowing for cost reduction, design simplification, and a smaller footprint. 8 billion industry which manufactures light-based transmission pathways for telecommunications, data networks, sensing, and specialized communication applications.
