

How much does a remote monitoring ODN product cost

Overview

The average remote monitoring cost is often \$20-\$80 per device per month before advanced services or custom integration. In regulated healthcare workflows, that range can go higher because compliance, onboarding, and clinical operations add cost. However, the price of an RTU is influenced by a variety of factors, including functionality, capacities, and (like all things) brand. Network monitoring service pricing is shaped by several factors: how many devices you're monitoring, what protocols and integrations you need, and whether you're deploying on-premises or in the cloud. The five services below use different billing units, sensors, hosts, resources, or technicians. RPM pricing depends on several components, such as:

- Cellular or Bluetooth devices: Cellular devices do not rely on the patient having Wi-Fi or a smartphone. Stream real-time metric data from LM Collectors to your systems for proprietary data analysis. What if you could hire a team member that works.
