

# How to remove the fiber optic coupler

## Overview

To remove a fiber optic cable from an SC connector, you must first unscrew the fiber connector and then twist the fiber cable. If you are unable to do this, there are some tools you can purchase to remove the fiber from the connector. Common types of connectors include: LC (Lucent Connector): Compact with a push-and-latch mechanism. You need a hammer and a chisel. Just make sure you hit it with the cletopt when you reconnect it bud Missing the housing which disengages the latches inside the. Before disconnecting the connector, give it a thorough inspection to make sure it is not cracked or damaged. To release the latch, apply. Diamond lapping films (polishing papers) are used to remove zirconia ferrule material, this is needed when a glass fiber breaks off below the ferrule surface.
