

Korean 144-core fiber optic cable junction box

Overview

The 144 cores dome type fiber optic splice closure come with 2 inlets and 4 outlets, which is including 6 splice trays, each accommodating 24 fibers. The fiber optic joint box body is crafted from reinforced plastic, a material renowned for its high strength and corrosion resistance. The closure provides reliable sealing performance, and fiber splicing point protected in a ribbed. The ADSS/OPGW metal junction box is also called a splicing box that is designed to house the fiber core splices to the outdoor intermediate optical cable leading to the patch panel in the control room. The fiber core splice is to connect the trunk cable (e. Durable Construction: Made from high-strength engineering plastics. High-Quality Construction: The 144 Cores Fiber Optic Cable Splice Junction Box is made from high-quality PP/PC materials, ensuring durability and reliability in demanding network environments.
