

## Panel with fiber optic cable connector on the back

### Overview

Fiber patch panels are devices with multiple ports for fiber connectors, used for fiber cable management, e. Consolidate your fiber optic connections in industrial environments with our DIN rail patch panel, with a modular design and tool-free installation save space and simplify deployment. These individual strands will then connect to electronic devices. Cisco is introducing a family of fiber management solutions with a debut of SMF and MMF patch panels. The Cisco ® solution of panel and cable assemblies offers versatile solution for any breakout. Each fiber from an outside-plant cable is terminated on the panel—typically via connector adapters—and then patched with short jumper or patch cables into an Optical Line Terminal (OLT) port or onto another fiber route. HDX panels offer manageable density of up to 96 LC fibers per RU with.
