

## Place a network cabinet on the balcony

### Overview

Notwithstanding any applicable local building codes, a cabinet is not necessary in a private dwelling. They keep the network equipment and wiring termination points away from curious (or. A home network wiring cabinet, also known as a network rack or cabinet, is a dedicated space where you can install and organize all your networking equipment, such as routers, switches, modems, and other devices. The location doesn't have any rooms available. If it matters the project involves running cables from the switches into several IoT devices mounted to the outside of the building. Are. While I originally was going towards a waterproof cabinet, because of high temperatures inside the box I had to add a fan that exhausts at the top. The basement is finished and there's a utility room where the contractor that the custom builder hired had placed all terminated ethernet cables (qty 10) and there are 3 or 4 non terminated ethernet cables. If you're building a house, adding a little network room or a structured media enclosure is one of the smartest decisions you can make.
