

SFP 10 Gigabit Optical Module Parameters

Overview

The SFP-10G-ER transceiver moves data at 10Gbps. It works over single-mode fiber for up to 40km. This makes it good for long network connections. These help keep signals strong. The Cisco ® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider transport applications. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Single-fiber bidirectional (BIDI) optical modules must be used in pairs. This comprehensive guide dives deep into its specifications, applications, compatibility, and why choosing the right module, like those from. The industry-standard Cisco Small Form-Factor Pluggable (SFP) Gigabit Interface Converter (Figure 1) links your switches and routers to the network. 5 Gigabit Ethernet is a nice compromise to upscale network services with more affordable equipment and SFP modules than 10-Gigabit range of products.
