

Should the switch be connected via network cable or fiber optic cable

Overview

After the physical configuration, switch on the switch and connect it to the network via Ethernet or optical connection, depending on the connectivity needs. If you have multiple Ethernet switches that need to be connected over long distances, fiber is obviously a preferred choice. This article aims to provide a comprehensive understanding of how network switches are connected to fiber. Those who use fiber to connect switches together what do you use?

Hi everyone I'm looking at buying some SFPs to connect my switches together rather than using the copper ports. I'm debating if MM or SM would be better as I'll be buying the 1g optics from fs. We had bought the new switch model C9200-NM-4X. Now we want connect the fiber cable from existing core switch model. When it comes to establishing a high-performance, low-latency network, selecting between fiber optic cabling and twisted pair Ethernet cabling can significantly impact overall system efficiency.
