

Small square brick tail fiber

Overview

SC-SC Type: Known as square to square tail fiber, often used for interconnecting optical boards between devices. Utilized in Huawei OSN series, ZTE S series devices, and earlier Lucent. Fiber pigtailed are simple in appearance, yet essential in function. They are the bridge between fiber optic cables in the field and the equipment or patch panels that manage them. By combining factory-installed connectors with spliced bare fiber, pigtailed ensure that network installers can create. Bynet Square Tail Fiber Pigtail is a precision-engineered optical component designed for high-accuracy light coupling, micro-optical device integration, and fiber-optic sensing systems. It is typically used to connect fiber optic transceivers, fiber optic switches, fiber optic splitters, fiber optic. A tail fiber, also known as a fiber optic patch cord, consists of a connector on one end and a cut end of the fiber optic cable core on the other.
