The FlexDrop design supports up to two 12-fiber FlexRibbons in the central core, resulting in a compact overall diameter. The round. Corning SST-Drop™ All-Dielectric Self-Supporting (ADSS) cables offer the ease of installation of standard ALTOS cable in an easy-access, single-tube design. The long-length ADSS version allows pole-to-pole span lengths ranging from 400 feet under NESC heavy ice and wind loading conditions to 500. We are a manufacturer of FTTx Flat Drop Flexible Fiber Optic Cable for the Last Link direct buried, conduit Underground or self-supporting aerial. Our factory approved ISO9001:2015, and we have UL, CE, FCC, ROHS, CCC, CPR. Optical Connectivity 1 AFL's Pre-terminated Drop Cable Assemblies are engineered to meet the rigorous performance standards required for today's FTTH (Fiber to the Home) applications. These assemblies help reduce costs by eliminating labor-intensive field terminations while delivering the same. Fibre optic cable is an advanced type of network cable, offering significantly improved performance in terms of bandwidth and data carrying than traditional metal conductor versions. Fibre optic cables are commonly found today in higher-end internet, phone and TV applications.
