

Sudan Non-perforated Cable Tray

Overview

Non-perforated cable trays of 60 mm in height and of various widths, made of galvanised sheet metal or stainless steel, optionally powder painted in the desired colour. In the basic cable tray version, the boreholes/perforations are only designed for joints and covers of cable. Keep your cables safe and organized with our high-quality cable trays. Cable Trays are important for ensuring the protection of the wiring system and supporting insulated electric cables used for distribution and communication. Are you looking for an installer or a sales point?
