

## Upgraded version of OTDR test module for distribution network automation

### Overview

Use VeExpress from the >Utilities >Tools menu to get the latest delta or full software updates or go to [www.com](http://www.com) to download the full upgrade packages to keep the test set and modules up to date. Do not downgrade software versions, unless instructed by a customer. The latest software release includes several usability enhancements, these are the main new functional additions, for more information please see the release notes: For full details of all enhancements across the platforms please see the software release notes on [updatemyunit](http://updatemyunit). Launch and receive cable information addition into pdf report. VIAVI default splice threshold changed to 0. Configuration file overwrite management. Locked markers no longer lost during consecutive tests. Dimension's versatile OTDR fiber optic tester helps field technicians reliably and cost-effectively install, turn on, troubleshoot, and monitor any optical network architecture. The product adopts the architecture of test module + handheld universal test platform, integrating OTDR, visual fault. These modules offer automatic and bidirectional OTDR measurements. The OTU-8000 Optical Test Unit combines optical time-domain.
